Registre de càncer de Mallorca Servei d'Epidemiologia

Taules 2001-2008

Palma, 5 juny 2013

Agraïments

El Registre poblacional de càncer de Mallorca va ésser creat l'any 1989 pel Grup d'estudis del càncer colorectal. Des de l'any 2008 forma part del servei d'Epidemiologia de la Direcció General de Salut Pública i Consum de la Conselleria de Salut, Benestar i Família.

El nostre agraïment més sincer als Hospitals Son Espases, Manacor, Son Llàtzer i Inca; a les Clíriques Rotger, Policlínica, Juaneda i Palma Planas; als Hospitals Joan March i General i al Institut Balear d'Estadística. Especialment, el nostre agraïment als Registres de tumors de Son Espases i Manacor, als serveis d'Anatomia Patològica, Hematologia i Oncologia de tots els hospitals públics i privats, al servei d'Oncologia Pediàtrica de Son Espases, als serveis d'Admissions dels hospitals públics, als Serveis Centrals de GESMA, a la Gerència d'Atenció Primària de Mallorca, i al servei de Demografia del IBESTAT.

És la voluntat de la Direcció General de Salut Pública i Consum que el Registre de càncer de Mallorca estigui a la disposició de tots els professionals sanitaris de la nostra comunitat autònoma per a la realització d'estudis i tesis doctorals que ens permetin avançar en el coneixement dels diferents tipus de càncer.

Per qualsevol aclariment o per obtenir més informació relacionada amb el Registre, podeu contactar amb: Maria Ramos Monserrat (telèfon: 971784182; mramos@dgsanita.caib.es <mailto:mramos@dgsanita.caib.es>).

Índex

Notes metodològiques

Taules 1-16: Número de casos incidents per localització tumoral, grup d'edat i sexe

Taules 17-32: Taxes d'incidència específiques, ajustades, truncades i acumulades per localització tumoral, grup d'edat i sexe

Taules 33-48: Número de defuncions per localització tumoral, grup d'edat i sexe

Taules 49-64: Taxes de mortalitat específiques, ajustades, truncades i acumulades per localització tumoral, grup d'edat i sexe

Notes metodològiques

Per a la presentació de dades hem utilitzat la desena revisió de la Classificació Internacional de Malalties (CIE-10), tot i que la codificació de casos s'ha fet segons la Classificació Internacional de Malalties per Oncologia (CIE-O) 3^a revisió. La conversió a CIE-10 es fa per tal de facilitar la comparació de les nostres dades amb les dades dels registres publicades a Cancer Incidence in Five Countries.

A més de les dades presentades en aquestes taules, disposem també de dades des de l'any 1988, publicades en anteriors monografies:

- El càncer a Mallorca 1997-2000. Incidència i mortalitat.
- El càncer a Mallorca 1993-1996. Incidència i Mortalitat.
- El càncer a Mallorca. Incidència i Mortalitat 1989.

Des de l'any 2000 no es registren els casos de càncer de pell basocel·lular ni escatós. No obstant, tenim una sèrie de casos d'aquestes entitats del període 1988 a 1999 i tenim recollits els casos dels anys següents, per la qual cosa eventualment es podria recuperar la sèrie.

Pel càlcul de les taxes s'ha utilitzat com a denominador una estimació per Mallorca feta per nosaltres a partir de les estimacions intercensals per les Illes Balears (Censos dels anys 1978, 1981 i 1991) i les estimacions de la població actual per les Illes Balears calculades a partir del Cens 2001. Per aquesta estimació s'han tingut en compte els pesos dels diferents grups d'edat en els padrons dels anys 1986, 1991, 1996, 2002 i 2007.

Les fórmules dels indicadors presentats es poden consultar a les publicacions anteriors del Registre.

Les abreviatures utilitzades són: CASO (Número de casos); S.E. (casos sense edat); T.B. (taxa bruta); T.A. (taxa ajustada a població mundial); T.A.eu (taxa ajustada a població europea); T.TR. (taxa truncada 35-64 anys); T.A.C. (taxa acumulada fins als 74 anys).

Taula 1. Nombre de casos per localització tumoral i grup d'edat a dones, 2001
